WHO WE ARE

ASTERDENT ORTHODONTICS

Orthodontics, derived from orthodontia, means Perfect. That precisely is what Asterdent products are all about.

A privately owned company, Asterdent specializes in bringing to you medical dental equipment, in wide variety and state-of-art designs. From Lingual, litigating to multi-functional brackets, to ties, bands, wings, buttons, hooks and stops, you ask for it, Asterdent delivers it to you.

Our products have made their mark among our esteemed clientele. We have on board experts and medicos, with who we have developed a bond of trust and long drawn cooperation.

Asterdent provides widest range of competitively priced high quality surgical and medical dental equipment. The perfect features, fine finish, functional ease and reliability of our products have made us a name to rely upon.

A dedicated team of professionals with commitment to give you the best of products, and excellent services, Asterdent looks ahead to a wonderful cooperation with you. Let us be a part of one big family. Asterdent and YOU.

Like we say at Asterdent... Smile. It's a simple therapy.

million reasons to smile.

The cure to almost all health issues begin with a simple treatment. Smile. Asterdent recognizes this principle and brings to you products which can be defined as best of dentistry and orthodontic equipment, designed under stringent quality control and state-of-art mechanisms.

PREMIER PRODUCT QUALITY

Besides paraphernalia of innovative equipment and products for a string of dental procedures, Asterdent abides by the finest standards of designs and ever-evolving ideas. It offers finest and premier quality products for dental procedures from diagnosis to surgeries, dental implants, denture fabrications, smile designs, oral rehabilitation and dental hygiene and various cosmetic procedures.

ASTERDENT CLIENT

Just as Asterdent cares for its products, we treat our clients as part of one big family. Our commitment to customer satisfaction includes high quality after-sale services. We value your feedback and that is the reason Asterdent has excellent customer care services with business partners across the globe.

PROFESSIONAL ETHICS

Asterdent swears by professional ethics as we provide all our clients an excellent service that covers all their key requirements on the line of quality, reliability and value for money. We maintain the highest standards of trustworthiness and safety that our clients have expected of us, at the best price in the market.

Dental History Facts

- * In 1866 Lucy Beaman Hobbs became the first licensed female dentist.
- * In 1986, the winner of the National Spelling Bee won by spelling ODONTALGIA (which means toothache)
- * The earliest dentist known by name is Hesi-Re. He lived in Egypt over 5000 years ago.
- * In Egypt, mummies have been found with tooth fillings of resin and malachite. Loose teeth were held together with gold wire.
- * The first toothbrushes were tree twigs. Chewing on the tips of the twigs spread out the fibers, which were then used to clean the teeth.
- * Ancient Greeks used pumice, talc, alabaster, coral powder or iron rust as toothpaste.
- * George Washington never had wooden teeth. His dentures were made from Gold, hippopotamus tusk, elephant ivory and human teeth!!
- * Blacksmiths in early America often served as Dentists also
- * In 201 AD the Romans were dental experts - using gold crowns and fixed bridgework, and a paste made of ground eggshell and honey to clean the teeth.
- * In 1905 dental assistant Irene Newman was trained to clean teeth. She became the first Dental Hygienist. She served under Dr. Alfred C. Fones, who was credited with coining the term "dental hygiene"
- * The first toothbrush with bristles was manufactured in China. Bristles from hogs, horses and badgers were used.

Self-Ligating Brackets

Simple Operating

Instead of using elastic bands that grab the wires like parking brackets, ASTERDENT self-ligating bracket has a unique built-in sliding lid that captures the wires. When doctors want to put wires, they only need to slide the lid down to open the slot and then close the lid after putting wires. It is very easy for doctor's operating and demands much less time.

Low Friction Force

The unique built-in sliding lids of ASTERDENT self-ligating brackets capture wires, which makes all the wires slide through the brackets freely. It translates into less friction force. Teeth can slide into their desired positions more quickly and more comfortably.

Fewer Clinic Visits

Since ASTERDENT self-ligating brackets work more efficiently, they require fewer adjustments. They demand adjustments for every 6-8 weeks while conventional brackets demand every 4 weeks adjustments. Light forces are biologically compatible means that they work with your body for gentler and quicker teeth movements. The overall treatment time will also most likely shortened.

More Comfortable

The ASTERDENT self-ligating brackets have unique built-in sliding lids, which allows us to use high-tech, light force wires to achieve teeth movements. This means less pressure on our teeth for more comfortable treatments.

Keeping Oral Health

It is a difficulty for conventional brackets to keep oral health because food leaves on elastic ties or stainless wires it is not easy to clean. By using built-in sliding lids, the ASTERDENT self-ligating brackets are good at keeping the food away from the teeth and improving oral health.

Sapphire Ceramic Brackets

- **Excellent Sliding**
Performs like a metal bracket
- **Easy Bonding/Debonding**
Double fusing method
Low node strength
Unique heat treatment
- **Comfortable feeling**
Rounded edge bracket
Low profile

- **Clearness**
Monocrystalline sapphire
Transparent bracket
Outstanding aesthetic feature
Great balance with any teeth color

Metal Brackets

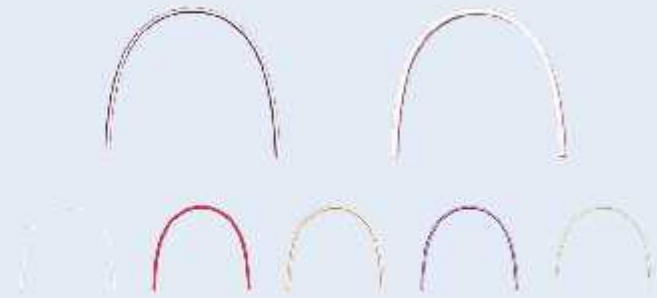

Asterdent Orthodontics is proud to present our wide variety of bracket systems.

We carry a wider selection of bracket systems than any other Chinese orthodontic companies.

PROTECT tries to cater to every doctor's individual needs by supplying the products at competitive prices & international quality levels.

Asterdent

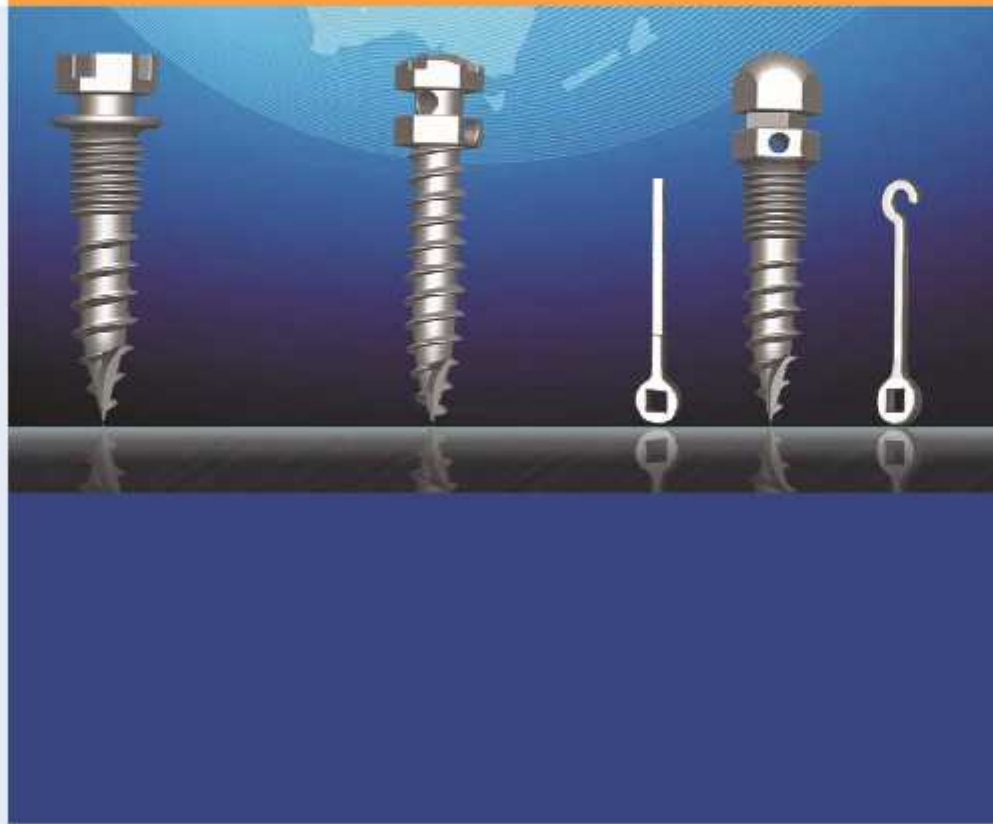

Molar Bands

ASTERDENT offers a wide range of first and second molar bands, ASTERDENT has regular temper and firm temper, anatomically fitted, as well as wide and narrow molar bands to meet the doctor's needs. Popular size available in 30#-44#+
Lingual indent helps for a precise fit and reduces occlusal interference.
Permanent laser-etched marking makes identification of the band size fast & easy.

Buccal Tubes

MIM-technology allows us to produce buccal tubes that are not only increased in strength, but also we have the freedom of design to produce smaller precision tubes to increase clinical efficiency and patients' comfort.
Both occlusal interference and gingival irritation are reduced, and hygiene is improved.
All Non-convertible tubes provide two shapes of meshes..
All convertible tubes incorporate a true "twin" bracket tie wing design to aid in ligation
Available in Roth, MBT & Edgewise prescription.
Available as bondable or weldable.

ASTERDENT Micro screw system provides efficient and flexible biomechanics. This appliance significantly enhances the treatment capabilities and can be extremely effective in reducing treatment time, surgeries, and extractions. Appliances can be inserted chair side and loaded immediately.

Superior versatility, simplicity and ease of use by design.

- Double screws allow greater control of tooth movement
- Increased patients' comfort
- Decreased reliance on patients compliance
- Anchors are self-tapping, allowing easy placement and removal chair side
- Anchors have a multi-functional top offering maximal versatility and performance
- Anchors are available in various lengths
